

How to install IPTV on KODI Version 16 & Lower

- **Open Kodi**
- **Select SYSTEM**
- **Select TV (or Live TV if you are on a version lower than 15.2 and if you are then consider updating)**
- **Select General**
- **Select Enabled** You will now see a pop-up saying that you have no PVR Client enabled.
- **Select OK**
- **Scroll down and select PVR IPTV Simple Client**
- **Select Enable**
- **Select Configure**
- **In General select M3U PlayList URL**
- **Add your M3U URL into the address section**
- **Select OK**
- **Select OK again**
- **Reboot Kodi**
- **On your Home Screen, you should now see TV (or Live TV if on an older version of Kodi).**
- **Open that to see the live channel list**
